# Orange Business Services expands Telepresence inter-exchange with Tata Communications

## customers will benefit from extended global collaboration via intercompany Telepresence experience

Orange Business Services has expanded Telepresence Community, its B2B Telepresence solution, through an interoperability agreement with Tata Communications' <u>Global Meeting Exchange</u> to allow customers to conduct Telepresence meetings seamlessly on each respective network. The collaboration will provide customers of each organization with open access to connect across a much broader business ecosystem.

Launched in July 2010, <u>Telepresence Community</u> enables Orange customers that have invested in <u>immersive video technology</u> to not only hold Telepresence meetings within their own enterprise, but also with customers, suppliers and partners that are either connected to the <u>global MPLS platform</u> <u>of Orange Business Services</u> or that of a partner carrier.

This agreement enables meetings to take place between Telepresence Community customers and any private or public room on the Tata Communications Global Meeting Exchange, and vice versa. Tata Communications currently has the largest global network of public Telepresence rooms and is present in 31 major cities across five continents, with its 33 rooms spanning 17 countries.

Technip, a world leader in oil engineering, technologies and services, participated in a beta test of this new inter-Exchange service. As an existing Orange Telepresence Community customer, Technip held successful Telepresence meetings with one of its business partners who is a Tata Communications' Telepresence services customer connected to the Global Meeting Exchange and meetings with the Tata Public Room at the Taj Boston.

Commenting on the trial, Bruno Bligny, in charge of the Telepresence project at Technip, said: "We see this expansion of the Orange Telepresence Community and the partnership with Tata Communications as a major benefit for investing in this collaborative technology in order to enhance communication with our global team, our customers and our partners."

According to Marc Blanchet, senior vice president of Global Communications Solutions, Orange Business Services: "Video will be a major growth area over the next few years as enterprises realize the benefits it delivers in terms of increased productivity, intimacy with partners, cost savings

and environmental protection. In fact, we have already seen a 130 percent increase in sales of Telepresence rooms over the past 12 months. Interconnection with Tata Communications is particularly exciting due to its growing base of global and regional enterprise customers and ongoing investment in public Telepresence rooms around the world. This collaboration significantly broadens the scope of Telepresence opportunities."

Peter Quinlan, vice president, Telepresence Managed Services, Tata Communications, commented: "We are pleased to now support meetings between customers on Tata Communications' Global Meeting Exchange and those within the Orange Telepresence Community. Based on the excitement expressed by our customers in initial successful meetings held in advance of this announcement, we anticipate strong demand for collaboration across the Orange and Tata Communications Exchanges. We are also pleased to welcome Orange customers to Tata Communications' Public Room network, which they can now access for even greater collaboration opportunities across their business ecosystem."

With Orange Business Services, customers benefit from a Telepresence network accessible in 140 countries and Telepresence Community in 45 countries with additional coverage planned in 2011. Telepresence Community – Inter Carrier is available to customers using TelePresence equipment from Cisco Systems; in addition, plans are underway to expand to vendors with other systems in order to enlarge the global Telepresence community.

A video interview with Andrew McFadzen, head of Global Marketing, Network Solutions, Orange Business Services, is available online:
