

Unified Defense

all-in-one **security**
entirely managed by
Orange Business Services

"This managed solution frees up my resources, letting me focus on tasks with higher added value."

Franck G.
IT Manager

Based on a unique combination of unified threat management equipment and expert management services, Unified Defense protects your resources from external threats and provides:

- network firewall
- anti-virus gateway
- intrusion detection and prevention
- URL filtering
- authentication
- high availability

Unified Defense provides full perimeter security for sites ranging from centrally-run SME sites to remote sites, branches and subsidiaries of large companies.

**Business
Services**

combine security with simplicity and flexibility

- with our unique system, all of the functions you need to protect your infrastructure are controlled centrally – giving you better consistency between your sites
- the modular nature of Unified Defense enables you to upgrade your security solution upon request with intrusion detection and prevention, URL filtering, etc.

maintain control without restrictions

- managed entirely by Orange Business Services, your security equipment, which can be installed at your own site or hosted at our IT centers, is dedicated to your own use – freeing you from implementation and operational issues
- your security is monitored 24/7 by our supervision systems and vulnerability detection tools
- online control panels and detailed statistics give you a full, exhaustive view of your security equipment's activity
- you enjoy the back-up of a team of security experts providing daily support for your production requirements and maintenance of your solution (operating system updates, installation of relevant patches, back-up management, log processing, etc.)

manage costs efficiently and effectively

- you benefit from the best value-for-money solution on the market
- Unified Defense enables you to optimize security-related costs by reducing your total cost of ownership
- your budget is fixed and predictable: Unified Defense is available in the form of a monthly subscription

Unified Defense: a DEFEND solution

The DEFEND solutions from Orange Business Services combine all functions required for protecting company resources (firewall, anti-virus, URL filtering, proxy, anti-spam, etc.) and are suitable for all types of environments (infrastructure, applications, user workstations) and all company profiles (central/regional structures, remote branches/sites, etc.). Depending on your requirements, you can choose integrated, managed or embedded solutions in our communications services.

good to know

Unified Defense is the only truly global managed unified threat management solution on the market.
